

# DISVOIZE

**The new generation group  
tour guide system.**

**Improve your audience's audio  
experience straight through your  
smartphones.**

# WHAT IS DISVOIZE APP?

DisVoize is the flexible and sustainable alternative solution to traditional Tour guide audio systems.

The app gives tour participants the flexibility to wander at will while they enjoy the live experience, using their own smartphones and headsets. The app works through mobile data or WiFi!

# HIGH PERFORMANCE AND LOW CONSUMPTION

## Spotify comparison for better understanding

Average Battery  
consume 6% per hour  
with the app working in  
background.

Average Data consume  
28 MB per hour.

Average Battery  
consume 6% per hour  
with the app working in  
background.

Average Data consume  
33 MB per hour.

# INSTALL AND CONNECT DISVOIZE APP

In order to deliver a better audio quality we invite guides to use a unidirectional microphone.

**IMPORTANT: DON'T FORGET TO INFORM YOUR PUBLIC TO BRING THEIR OWN PHONES CHARGED AND THEIR PERSONAL HEADSETS FOR THE TOUR!**

# WELCOME!

When the user opens for the first time DisVoize app he/she has to:

- Agree the Terms & Conditions
- Give to DisVoize the permission to use the microphone

# SPEAKER ASSETS

Only the speaker has to login into the platform (this step is not necessary for the listeners).

After that DisVoize app generates a prefix speaker name (ex. Manuel) that allows to create a new personal channel name.

# SPEAKER

The speaker creates a new channel name.

The channel name is formed by three elements:

1. **Prefixed name** 2. Dash symbol (-) 3. **Customizable word**

ex. **manuel-hellogroup1**

Channel Name

manuel-

**Connect**

# LISTENERS

In order to connect the listeners have to write into the text box the same channel name previously created by the speaker, respecting the three elements:

1. **Prefixed name** 2. Dash symbol (-) 3. **Customizable word**

ex. **manuel-hellogroup1**

A screenshot of a mobile application interface. At the top, the text "Channel Name" is displayed. Below it is a text input field containing the text "manuel-hellogroup1". At the bottom of the screen, there is a white button with the text "Connect".

# IMPORTANT

Make sure listeners write correctly the channel name previously created by the speaker, respecting:

- Spaces
- Don't forgetting the Dash symbol (-)

A screenshot of a mobile application interface for a speaker. The title bar is purple with a back arrow on the left, the text "Speaker" in the center, and a three-dot menu icon on the right. Below the title bar, there is a text input field with the label "Channel Name" above it. The input field contains the text "manuel-hellogroup1". Below the input field is a white button with the text "Connect".

A screenshot of a mobile application interface for a listener. The title bar is purple with a back arrow on the left, the text "Listener" in the center, and a three-dot menu icon on the right. Below the title bar, there is a text input field with the label "Channel Name" above it. The input field contains the text "manuel-hellogroup1". Below the input field is a white button with the text "Connect".

# USERS CONNECTED

When listeners are connected to the same Speaker's channel, they can enjoy an amazing audio experience as long as they want!
